

ROHIT DODTI

GENAI DEVELOPER | APPLIED AI AND DATA ANALYTICS

Mumbai, India | 9029578911 | rohitdodtiwe@gmail.com | linkedin.com/in/rohitdodti

PROFESSIONAL SUMMARY

GenAI and data professional with **5+ years of experience** building document-based AI assistants, analytics solutions, and automated data workflows. Hands-on experience with RAG, LLMs, LangChain, LangGraph, FastAPI, Streamlit, SQL, Python, and Power BI. Combines AI application development with expertise in survey analytics, data quality, stakeholder reporting, and translating business requirements into reliable, user-focused solutions.

PROFESSIONAL EXPERIENCE

Reporting Analyst (GenAI & Survey Analytics) | Numerator

Jul 2025 - Present

- **GenAI Survey Documentation Assistant:** Developed a **RAG**-based application for Tivian survey documentation, reducing manual search effort by **40%** and accelerating access to technical guidance.
- Built and evaluated document-ingestion and retrieval workflows using **LangChain**, **LangGraph**, **Typesense**, **FastAPI**, and **Streamlit**, refining chunking, metadata filters, prompts, semantic search, and source-grounded citations.
- Developed **FastAPI** endpoints to connect document retrieval and LLM workflows with the **Streamlit** user interface.
- Designed, scripted, and tested dynamic surveys in **XML** across **Tivian/EFS** and **QMob**, translating research requirements into validated survey logic.
- Processed large-scale survey datasets with **SQL**, **Python**, **R**, and **SPSS**, reducing validation time by **25%** and improving data reliability.
- Optimized **SQL** workflows for extraction, joins, validation, and reporting, improving turnaround time by **20 to 30%**.
- Applied statistical analysis to identify consumer behavior patterns and translate research findings into actionable stakeholder recommendations.

Product Engineer (GenAI, Data & BI Solutions) | Tata Consultancy Services

Apr 2021 - Jul 2025

- **ERP Knowledge Chatbot:** Built a proof-of-concept conversational assistant for an ERP module to help users retrieve process guidance and answers from internal documentation.
- Implemented a **RAG** workflow with document chunking, embeddings, semantic retrieval, prompt templates, and source-grounded responses through a **Streamlit** interface and **FastAPI** services.
- Evaluated chatbot responses against predefined ERP questions, identified retrieval gaps, and refined prompts and source content.
- Designed **Power BI** dashboards that reduced report-generation time by **30%** and improved visibility for business stakeholders.
- Automated **ETL** workflows across multiple sources, cutting manual integration effort by **40%**.
- Optimized **SQL** queries and stored procedures, reducing query execution time by **30%** and improving reporting performance.
- Implemented reusable **Python**, **Pandas**, and **SQL** data-quality checks to improve reporting consistency and reduce downstream errors.
- Collaborated with business and technical stakeholders on BI solutions and analysis that supported operational improvements and generated more than **INR 20 lakh in annual savings**.
- Participated in requirements analysis, solution design, development, testing, UAT support, deployment, and post-production troubleshooting.
- Managed code and configuration changes using **Git/SVN**, maintained technical documentation, and supported controlled production releases.

TECHNICAL SKILLS

Generative AI: LLMs (Large Language Models), RAG (Retrieval-Augmented Generation), Agentic AI, LangChain, LangGraph, Prompt Engineering, Semantic Search

Vector Search and Databases: FAISS, Typesense

AI Application Development: Python, FastAPI, Streamlit, REST APIs, JSON, XML

Data and BI: SQL, MySQL, Power BI, DAX, Power Query, Pandas, NumPy, R, SPSS, Excel

Platforms and Tools: Tivian/EFS, QMob, AWS (Amazon Web Services), Git, GitHub, SVN, Kaggle

PERSONAL PROJECTS

- **YouTube Video RAG Assistant:** Built a LangChain-based question-answering workflow that retrieves transcript segments and generates context-grounded responses using embeddings and a vector store. Processed video transcripts through text splitting and semantic retrieval, then supplied the most relevant context to the LLM for answer generation.
Technologies: Python, LangChain, YouTube Transcript API, OpenAI embeddings, FAISS, prompt engineering.
- **Agentic Research Assistant:** Developed an agentic AI workflow using LangGraph, Groq/OpenAI models, and Tavily Search for tool-assisted question answering. Exposed the research agent through FastAPI and Streamlit to support interactive queries and display generated responses.
Technologies: Python, LangGraph, Groq/OpenAI, Tavily, FastAPI, Streamlit.
- **Phishing Site Detection:** Built a machine-learning classification solution using TensorFlow and Random Forest to identify potentially malicious websites.
Technologies: Python, TensorFlow, Pandas, scikit-learn, Random Forest.

RECOGNITION AND CREDENTIALS

- Numerati Award - Numerator, Nov 2025 and Apr 2026
- Star of the Quarter - Tata Consultancy Services, Aug 2023 and Nov 2024
- Research Publication - International Journal of Advanced Science and Technology (IJAST)
- Data Analytics Bootcamp Certification – [Udemy], 2025

EDUCATION

Bachelor of Engineering in Information Technology | Fr. Conceicao Rodrigues College of Engineering | 2016 - 2020 | GPA 7.57/10
